Summary

Engineer building practical intelligence into production software across AI workflows, cloud-native platforms, ERP/CRM systems, automation, and developer tooling.

Technical Skills

Languages	Python, TypeScript, JavaScript, C++, Java, Solidity, HTML, CSS
Databases	MongoDB, MySQL, PostgreSQL
Cloud & DevOps	Docker, Kubernetes, AWS Lambda, GitHub Actions, Datadog
Tools	Git, GitHub, Linux, Android Studio, Postman, Jira

Experience

Pactle (backed by SouthPark Commons) - Founding Engineer (Aug 2025 - Present)

Led engineering delivery for 5+ enterprise ERP/CRM solutions; built AWS-native platforms, Datadog monitoring, CI/CD, automated debugging tools, and scraping systems.

Trilogy via Crossover - AI-First Software Engineer II (Apr 2025 - Present)

Built AI-augmented features with Angular, NestJS, and LangChain, improving workflow efficiency by 35%; maintained 100% test coverage and CI/CD with GitHub Actions.

Chegaro - Full Stack Engineer (Jan 2025 - Apr 2025)

Built Python and Airtable automation systems reducing manual operations by 70% and resolution time from 18 hours to 6 hours.

Techtale - Software Engineer (Feb 2023 - Jan 2025)

Optimized React/Next.js dashboards and Node.js APIs, improving load speed by 45% and reducing crashes by 30%.

Wisethug Clothing Pvt Ltd - Full-Stack Developer (Apr 2024 - Dec 2024)

Built Flask and React e-commerce platform serving 5k+ users, improved conversion by 22%, and automated AWS deployments.

Projects

ragktflow: Open-source local RAG system for developer knowledge transfer. Tech: LangChain, FAISS, FastAPI, React.

Artemis: Women safety app with SOS, cloud video sync, and gesture-triggered alerts. Tech: Flutter, Firebase, YOLOv8.

Edu-Bot: AI-powered educational chat platform with learning games.

Second-Brain: AI disease predictor covering 2,000+ conditions with 90% reported accuracy. Tech: TensorFlow, Flask.

Token Launchpad: dApp for deploying configurable ERC-20 tokens. Tech: Solidity, Hardhat, Ethers.js, React.

Certifications & Education

DeepLearning.AI: Structuring ML Projects, NLP Classification & Vector Spaces (95%), CNNs, Improving Deep Neural Networks. IBM: Exploratory Data Analysis for ML (87.5%), Supervised/Unsupervised ML, Agile Development and Scrum. UIUC: OOP Data Structures in C++ (99%). University of Minnesota: Lean Software Development (90.81%).

B.Tech in Computer Science, Bennett University - CGPA 8.6
